Re: Alder Creek Delivery

---

Tim, Doug asked me to forward his notes regarding Alder Creek.  
Shauna

10:29 AM 6/9/00: I went up the Vanous ditch yesterday to check it out as Clyde Lambert wanted water. There were three beaver dams in the ditch backing it up so that only about 20" are running a short way down stream. The piece of ground on the south side of the ditch belonging to Ellweins has been irrigated this season but was not being irrigated on that day.

11:31 AM 6/16/00: I have been down in the Alder Creek channel and in the Vanous. Due to beaver dams the water is backing up and not reaching down the original Alder Creek channel and into the river.

11:34 AM 6/16/00: We are reducing the flow at the head of the Darlington to allow for the water coming in at the head of the Darlington from Alder Creek.
